At a glance

- Mission of the OP3FT since 2012
- A project originated in France with a global reach
- Why OP3FT 中国 ?
- Mission of OP3FT 中国
- Current objectives
- Possible cooperation with the ISC:
 - Workshop during Chinese Internet Conference 2018
 - Participation to ISC working groups
 - Contribution to ISC events in China
 - Frogans Technology Conference in China in 2019
- Next steps

Mission of the OP3FT since 2012

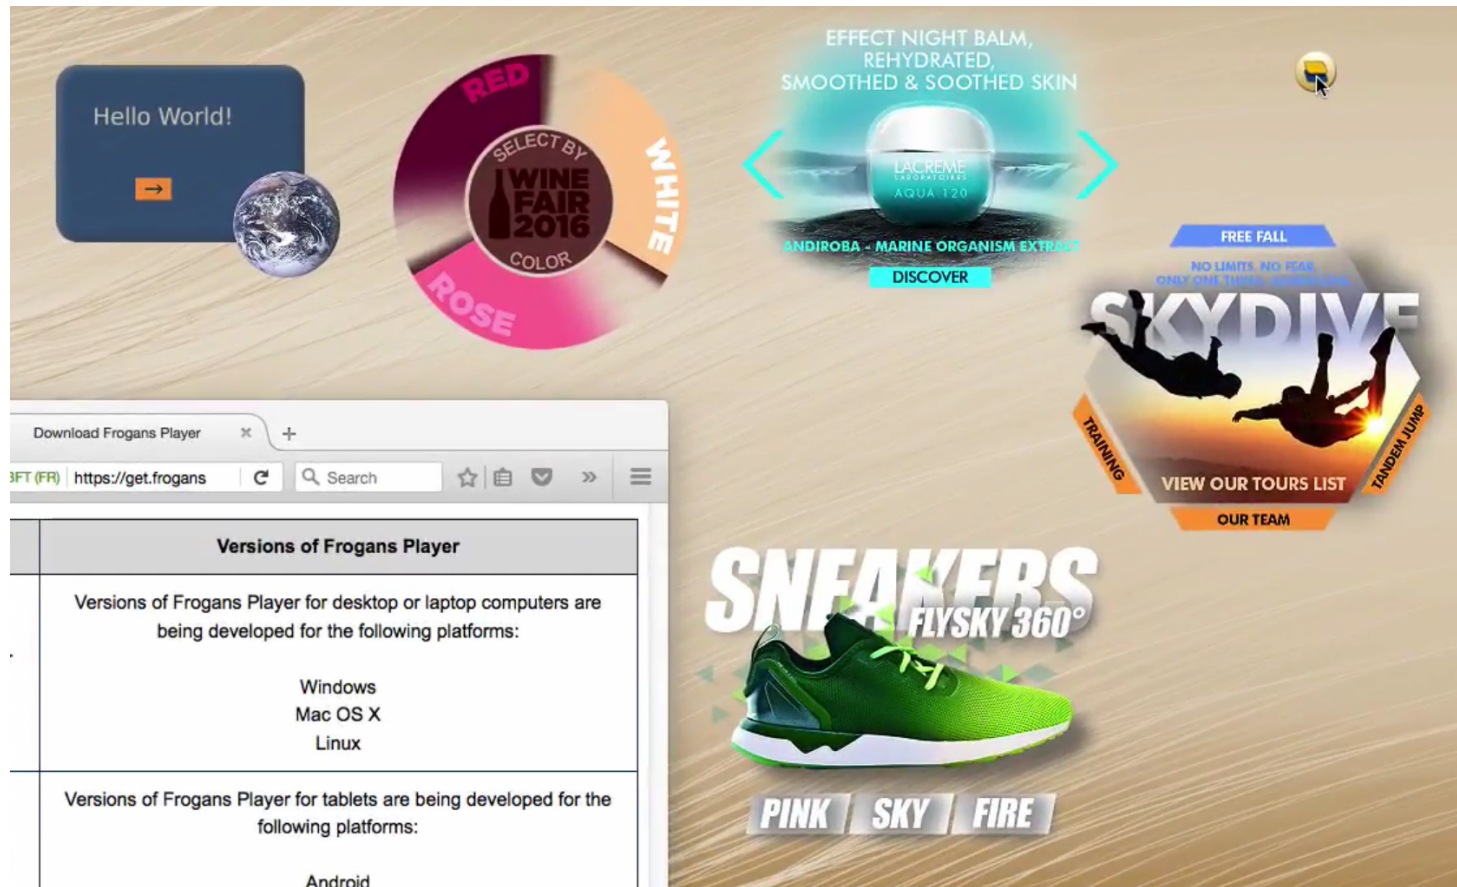

- The OP3FT is a standards developing organization (SDO), founded in France in 2012, with a team of 30 people.
- The purpose of the OP3FT is to hold, promote, protect and ensure the progress of Frogans technology, in the form of an **open standard** for the Internet, **available to all, free of charge**.
- At the OP3FT, we believe that netizens should not be dominated by the technology they use and should have **full control over aspects of the technology** that can directly impact their lives.
- For netizens, the Frogans technology is a new means for accessing content and using services in a **simpler and more secure way**.

Mission of the OP3FT since 2012

For **netizens**, the Frogans technology:

- is **invisible**: no tech is apparent, content floats on the screen
- is **universal**: no fragmentation, identical appearance on all devices, loads quickly over any network
- is **safe**: no need to take care of complicated security matters, there is a new end-to-end security model (from network protocols to file formats)
- **protects privacy**: no cookies, no information leaked behind the user's back, end users are in control of their personal data

Mission of the OP3FT since 2012

Download Frogans Player

3FT (FR) | <https://get.frogans> | Search

| Versions of Frogans Player | |
|---|---|
| Versions of Frogans Player for desktop or laptop computers are being developed for the following platforms: | <p>Windows</p> <p>Mac OS X</p> <p>Linux</p> |
| Versions of Frogans Player for tablets are being developed for the following platforms: | <p>Android</p> |

Mission of the OP3FT since 2012

- From a technical standpoint, the **Frogans technology** introduces:
 - a new type of online content, called **Frogans sites**
 - new software to navigate Frogans sites, called **Frogans Player**
 - new Internet identifiers for Frogans sites, called **Frogans addresses**
- The Frogans technology implements a new **generic software layer** on the Internet alongside other existing software layers such as E-mail (1972) or the Web (1989).

Mission of the OP3FT since 2012

Mission of the OP3FT since 2012

Frogans technology for Internet+

A project originated in France with a global reach

- The OP3FT has partnered with **organizations around the world** in order to ensure the **stability** and **long-term existence** of the Frogans layer:
 - **ICANN** (Internet Corporation for Assigned Names and Numbers) through the delegation of the **.frogans TLD** whose purpose is to ensure the security, stability and reliability of the Frogans layer for the benefit of all Internet users
 - **Afnic** (French registry of .fr domain names) which is the **back-end registry** for the .frogans TLD
 - **ADNDRC** (Beijing, Hong Kong, Seoul, and Kuala Lumpur) and **FORUM** (United States) which provide **dispute resolution** for Frogans addresses under the **UDRP-F**

A project originated in France with a global reach

- More than 30 organizations ready to provide Frogans address **watch services** in Europe, the Americas, Africa, Asia and Oceania.
- **User communities** are starting to emerge, e.g. in **Africa** (Ivory Coast, Burkina Faso).
- The OP3FT has presented the Frogans technology to many stakeholders **around the world**: European Commission, World Intellectual Property Organization (WIPO), International Trademark Association (INTA), W3C China...

Why OP3FT 中国 ?

- The OP3FT is **switching to the spread** of the Frogans technology.
- The OP3FT must ensure that the promotion and future development of the Frogans technology **meet the needs** of Internet users in all countries.
- In some countries, the OP3FT plans to open **local branches**.
- The OP3FT came to the conclusion that China was a country in which a local branch was required to fulfill its mission.
- OP3FT 中国 is the **first local branch** to be opened by the OP3FT.

Preparing the creation of OP3FT 中国

Mission of OP3FT 中国

- OP3FT 中国 will participate in the **development** and **promotion** of the Frogans technology.
- This mission will be carried out by a **local team** in Beijing.
- The team will:
 - do research and development
 - write technical specifications
 - produce source code
 - carry out tests
 - write documentation
 - write policies and contracts
 - etc.

Current objectives

- Identify and meet people to join OP3FT 中国 's team.
- Understand the prerequisites and good practices to host OP3FT 中国 (right location, legal aspects)
- Build a benevolent network of experts and professionals in China to help us in our early steps (the "OP3FT 中国 's friends").

Possible cooperation with the ISC

- **Workshop during Chinese Internet Conference 2018**
 - The OP3FT has attended CIC 2016 and 2017
 - A workshop dedicated to the Frogans technology might be of interest for different types of stakeholder in the Internet ecosystem in China
- **Participation to ISC working groups**
 - OP3FT 中国's team could participate in specific ISC working groups
- **Contribution to ISC events in China**
 - OP3FT 中国's team could share their insights with participants to ISC events
- **Frogans Technology Conference in China in 2019**
 - 8 Frogans Technology Conferences have been held in Paris, since 2014.
